Report # 12-147-2 (Tyent Ultra Filtration System)

Report Date: 05/23/2012

Customer Name: Tyent USA

Site Address: 137 Hurfville Crosskeys, Sewell NJ 08080

Date Sampled: 05/18/2012

## EXECUTIVE SUMMARY

A Tyent Ultra Filtration System was tested for reduction of Pesticides/Herbicides following the procedures of the NSF/ANSI Standard 53, section 7.2.1. The filter reduced the Pesticides to levels below the limits set forth by the NSF Standard 53. Passed.

## INTRODUCTION

A Tyent Ultra Filtration System was tested for reduction of Pesticides/Herbicides following the procedures of the NSF/ANSI Standard 53, section 7.2.1. The filter was challenged with water prepared at the Pesticides/Herbicides concentrations set forth in the NSF Standard 53; the filtration system reduced the Pesticides tested. The filtration system conforms to all the Pesticides/Herbicides reduction testing set forth by the NSF/ANSI standard 53. Passed.

Electric Pump (Flow Pressure 60 PSI).

## PROCEDURE

Connected the feeding chemical electric pump to a Tyent Ultra Filtration System, flushed about 1 gallon of tap water through the filter. Prepared 10 gallons of influent water with Pesticides/Herbicides at a concentration set forth by the NSF Standard 53; Table 2 summarized the Influent water properties. Pumped 10 gallons of Influent water through the filter system at a flow pressure of less than 125 PSI. Collected the effluent water and analyzed the filtered water for Pesticides/Herbicides using EPA 525 and 508 method of analysis. The results are summarized in Table 1 below.
